

# ANAS AL-KHATEEB

CTO, Full-stack Developer

+375 333 171 369 | Minsk - Belarus | anasbelarus@gmail.com

Accomplished, metric-driven Chief Technology Officer with over 8 years of experience leading cross-functional teams and designing high-availability enterprise architectures. Proven success delivering 10+ multi-tenant products, building platforms serving 15 countries, and engineering mission-critical national software applications. Expert in aligning complex business requirements with scalable backend infrastructures and mobile systems to drive organizational growth.

## SKILLS

- **Management & Architecture**
- **Backend Development**
- **Mobile Development**
- **DevOps & Infrastructure**
- **AI Workflow Optimization**
- **Data & Analytics**
- **API Design**
- **UI/UX**
- **Product & Business Alignment**

## WORK HISTORY

### Chief Technology Officer at Sharq Software LLC - Delaware (2025 - Present)

- Architected and deployed the core enterprise framework for "Sharq Souq," a highly scalable, multi-tenant classified advertisements platform that supports 15 countries.
- Overhauled legacy codebases into modern, modular infrastructure, resulting in enhanced system reliability and accelerated feature-deployment cycles.

### Chief Technology Officer at webbytes.de GmbH - Germany (2020 - 2025)

- Directly managed and delivered 10+ enterprise software products from conception to launch while steering system architecture and cloud server administration.
- Engineered multi-tenant enterprise data frameworks for prominent corporate clients, including Orga Data AG and Triskelstar AG.
- Scaled technical operations by restructuring engineering workflows, balancing cross-functional developer workloads, and leading technical recruitment pipelines.

### Team lead, Full-stack Developer at synergeto GmbH - Germany (2019 - 2020)

- Built the backend, frontend, and native iOS application for KrisenKompass (by TelefonSeelsorge), Germany's primary high-availability suicide prevention platform.
- Designed and documented 250+ secure, high-performance APIs utilizing a robust architecture tailored specifically to manage highly sensitive user data.

### BI Developer - Data Analyst at Klick Data SE - Sweden (2020 - 2021)

- Constructed real-time business intelligence models by analyzing transactional databases to drive strategic, executive-level reporting needs.
- Translated complex business requirements into scalable data models, leading stakeholder alignment sessions and mapping out core transactional data streams.

---

## **iOS Development Team Lead at Upservice.io - Delaware (2018 - 2019)**

- Supervised a dedicated team of iOS engineers, implementing automated testing and code reviews to drastically minimize runtime bugs and memory leaks.
- Refactored and modularized legacy mobile codebases, modernizing software stability and aligning applications with native Swift development standards.

## **iOS Developer at Everis Service - Minsk (2017 - 2018)**

- Programmed consumer-facing iOS applications featuring complex, real-time turn-by-turn navigation systems and spatial location-tracking mapping components.

## **Aviation Engineering Instructor at Mid-East Aviation - Amman (2014 - 2016)**

- Provided both theoretical "ground school" and hands-on practical training to students, covering a wide range of topics related to aircraft systems, maintenance procedures, safety regulations and performance evaluation, covering: B1.1 turbine engine aeroplanes, B1.3 turbine engine helicopters, student assessment.
- Hands-on experience in aircraft maintenance, repair, and overhaul (MRO) at Jordan Aeronautical Systems Company (JAC), including: Line and base maintenance on C130 Hercules, Boeing B737-200/300

---

## **EDUCATION**

Mid-East Aviation Academy - Amman, Jordan  
Aircraft Maintenance Engineer Diploma (2011 - 2013)

---

## **CERTIFICATIONS & TRAINING**

### **Aviation & Regulatory Licenses:**

- Certified EASA Part 66 B1 Engineer – European Union Aviation Safety Agency
- Certified FAA A&P Licensed Mechanic – Federal Aviation Administration
- Certified jCARC A&P Licensed Mechanic – Jordan

### **Technical & Compliance Training:**

- (EWIS) Electrical Wiring Interconnection System
- Fuel Tank Safety Level 1 & 2
- (SMS) Safety Management System
- Human Factors
- Aviation Legislation Part 145 Supplement
